

Create a simple flowchart for a Medical Management System containing five main modules: Patient Details, Doctor Details, Appointment, Medical History, and Prescription Details.

The flowchart should use standard symbols:

Oval → Start/End

Rectangle → Process

Parallelogram → Input/Output

Diamond → Decision

Flow should be: Start → Enter Patient Details → Enter Doctor Details → Book Appointment → Check Appointment Availability → If available, confirm appointment → Record Medical History → Doctor Consultation → Enter Prescription Details → Display/Store All Details → End. Make the flowchart clean, simple, properly connected with arrows, and suitable for a BCA assignment.
